BERRY
PRECISION SEEDER

NOW WITH PATENTED SEED CHANNEL!

The #1 Name in Affordable Seeding Equipment!
The Complete Seeding System

The Berry Precision Seeder System includes The Berry Precision Seeder, seeder plate, vacuum, inspection light, seed dumping tray, seed dumping tray holder, and more. Everything you need to start seeding is included.

Why Countersinks?
A Countersunk Hole grips the seed in such a way as to provide the highest singulation accuracy. They also provide a significantly greater effective target area for the seeds to find, therefore providing efficient seeding of Trial Packs and very small quantities of seed.
Versatility
The Berry Precision Seeder will seed virtually any plug tray or cell pack. Systems are available for seeding Oasis Cubes and Rockwool. Custom designs are also available.

The Berry Precision Dibbler
The unique design of this device provides placement of the seed in the center of the cells for uniform radial root growth. It also provides highly uniform planting depth across the entire tray thus promoting uniform emergence.
The Berry Precision Seeder

1. Perfect for small to midsize operations
2. One of the fastest and most accurate seeders available anywhere… at any price!
3. Seeds watermelon to raw petunias in plug trays as well as cell packs. Custom designs available.
4. No motors, solenoids, bearings, or electrical components to break down or wear out… ever!
5. Anyone can operate it… it’s that easy!!

OTHER FEATURES

• Made of light weight Polycarbonate and machined aluminum.
• Transparent seeder body allows for easy inspection for clogged holes and/or misses.
  • Seed the whole plug tray at once, not one row at a time.
  • No annoying holder is required as with some designs. The trays are directly seeded.
  • Corrosion Resistant.
  • Seed up to 250 trays per hour with unequaled accuracy.
